

Turbiwattinside service offering

The best guarantee for a successful deployment

Becoming an electricity producer, it is easy

Your site is not equipped

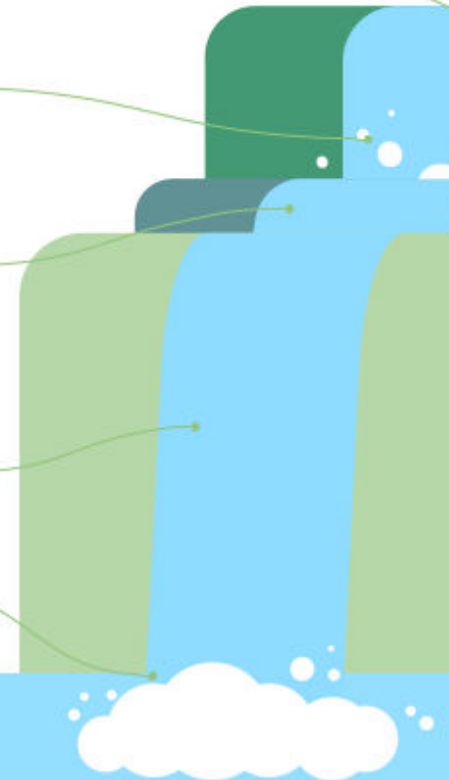

Benefit from a complete support in 5 steps

Your site is already equipped

Request an audit and proceed to step 3

		BENEFITS	ADVANTAGES
1	Feasibility study	Head, flow measurement Turbines determination Budget estimation Income estimation	Potential approval Perfectly dimensioned project
2	Administrative procedure	The rights Obtention of the prefectorial order Purchase obligation eligibility	A professional support Gain of time
3	Specifications	Realization of: <ul style="list-style-type: none"> - Planning - Costing - Detailed plan Funding study	Dedicated interlocutor Equipment knowledge
4	Deployment	Coordination between professions Network junction Obtention of the purchase obligation contract	Quality of installation Control over planning and costs
5	Support Maintenance Exploitation	Preventive maintenance Service interruption alarm Technical assistance	Sustainability of the installation and its production

OUR COMMITMENTS

Benefit from the industrial expertise of a specialist in small hydroelectricity:

- Mastered technology
- Secure deployment

An experienced team of engineers at your service

Control of the entire project to ensure optimal implementation and the best possible yield

Customised support

Dedicated interlocutor

Benefit from the manufacturer's guarantee and maintenance

Environment

The best carbon footprint of all renewable energies:

4g eqCO₂ per kWh produced

Optimise your return on investment

A win-win offer

- Global approach (equipment + project)
- Control and optimisation of budgets

Solution developed for low falls

- High efficiency
- Ultra compact
- Quiet and invisible

Industrialized production and economical

- Fixed settings
- Prefabricated cone for easy deployment
- Integrated generator
- Three propeller sizes
- Robust

Add value to your assets

The features of the Turbiwatt, compact and silent, facilitate :

Renovation, integration of new sites, renewal

Increasing your installed power (+20%)

The exploitation of the reserved or non-exploited flow

The renewal of the EDF purchase obligation contract
